Job Description

The AMC, University of Amsterdam, Department of Psychiatry is currently recruiting Associate(s), Assistant Professor(s), Associate Professor(s), or Professor(s) for Research or Tenure Track positions. These positions may have joint appointments with other collegiate departments as needed. Opportunities exist in the Department of Psychiatry neuroimaging research area, developing, conducting, and analyzing neuroimaging research.

The position responsibilities include but not limited to conducting research in collaboration with other faculty in areas of Deep Brain Stimulation, Obsessive Compulsive Disorder, PTSS, substance abuse, mood disorders, schizophrenia, using a variety of imaging modalities, including DTI, fMRI and structural MRI. New projects could examine a variety of neuropsychiatric disorders.

The candidate will be expected to provide training and teaching activities to faculty, staff, residents and graduate students as needed.

The Department of Psychiatry has a wide range of clinical programs as well as residency and research programs. Amsterdam provides the unique combination of a safe, small, and attractive college town with the opportunity to take advantage of abundant local and world-class cultural events.

Requirements

Candidates must hold a Doctorate in Psychology, Neuroscience or related field like Medical Biology.

Two years post-doctoral level training or equivalent in neuroimaging DTI, fMRI, structural MRI. Candidates must have a commitment to patient care, teaching and research. Desirable are candidates with evidence of neuroimaging research through publications, successful grant participation, experience with neuroimaging software tools such as FSL, AFNI, SPM, ITK

Conditions of Employment

A challenging project to work on within an inspiring clinical environment, as member of the young psychiatry group with a strong multidisciplinary and international approach and excellent facilities. Gross compensation is dependent on your training and experience.

You will be employed by AMC on a 1 year contract with the prospect of permanent. AMC offers a end year bonus of 8,3% of your salary.
